## Overview

### Description

The KVM console integrates multiple-port CAT5 KVM switches in a 1U height console. Multiple computers can be controlled from the single monitor-keyboard-mouse console.

There is no better way to save time and money than with a CAT5 console installation. By using the CAT5 console with its sliding console to manage your installation, you will gain below benefits: (1) eliminate the expense of purchasing separate keyboards, monitors and mice; (2) save all the space those extra components would take up; (3) save space that a keyboard, monitor and mouse would take with a standard KVM switch; (4) save on energy costs; and (5) eliminate the inconvenience and wasted effort involved in constantly having to move from on computer to another.

It is easy and fast to install the CAT5 KVM console; you just need to connect corresponding cables to the right ports of the CAT5 KVM and its module without software configuration.

KVM Console can connect multiple computers with RJ-45 connector and CAT5 connecting cables. Transmission distance is up to 100M, so it doesn't need a KVM extender.

### Features

- 18.5" LED backlight FHD LCD TFT monitor, high brightness, high resolution
- Metal 19" rack with 1U height
- Ultra slim 99 keys keyboard (PS/2) with small numeric keyboard
- High resolution and high flexibility with touchpad; with two function buttons and scroll wheel, standard PS/2 port

### Switch Functions

- Access and control up to 8 / 16 / 24 / 32 computes
- Support servers with VGA/ HDMI/ DVI/DP port
- Supports Multiple systems: Windows, Linux, Mac and Sun
- Two level password security--only authorized users view and control computers; up to four users and an administrator with a separate profile for each
- Convenient computer switching via front panel pushbuttons, hotkeys, OSD menu or mouse
- Auto scan feature for monitoring user-selected computers
- Broadcast mode--operations simultaneously performed on all selected computers
- Keyboard and mouse emulation function.
- USB or PS/2 keyboard emulation--computer boot even the console focus is else where
- Hot pluggable --add or remove computers without having to power down the switch

Structure and Size

1-1.2 Size

Rear View

1-1.3

| No. | Explanation             |
|-----|-------------------------|
| 1   | Power input (AC or DC)  |
| 2   | Power Switch            |
| 3   | USB Port                |
| 4   | Monitor Port            |
| 5   | PC connecting port      |
| 6   | Ground connecting screw |

Hardware Installation

Rack Mounting

A standard rack mounting kit is provided to mount the switch in a depth of 686-770mm a standard 19" rack. For other mounting distance, the rear brackets need to be customized accordingly

With one person hold the switch in place and the other person slides the L bracket into the switch's side mounting brackets from the front to the back, then screws the brackets to the rack.( see below installation drawing)

2-1.1 rack mounting (1)

2-1.2 rack mounting (2)

## KVM Installation Diagram

- 1) Make sure the KVM console has been connected to the ground.( ①)
- 2) Connect any available KVM port and KVM adapter with CAT5 cables.( ②)
- 3) Connect the adapter to the KVM and the PC or server(③)
- 4) Plug the female port of the power cable in the KVM power socket, and plug the male port in the AC power port.( ④)

### 2-1.3 Install KVM components

Note:

1. Connect external USB keyboard, mouse and monitor according to the ⑥ step in
2. If cascading required, please connect KVM console and KVM switch with adapter (⑦), and Hotkey need to be different with KVM console and KVM switch. Please check the hotkey setting with OSD below (also page 20):

2.1 Turn off Mouse Hotkey function (F4: Tool -> Mouse Hot **【On】** )

2.1 Keyboard hotkey setting (F3: Set -> OSD Hotkey)

| Components | Function |                                                                                          |
|------------|----------|------------------------------------------------------------------------------------------|
| Green      | Online   | Indicates that the corresponding host has been connected to the KVM switch and Power On. |
| Orange     | Selected | Indicates that the corresponding host is in use.                                         |

## Operation

- Release the release catch;

### 2-2.1 unlocking

**\*Note: The release lock can only do horizontal locking, it can't bear any load.**

- Pull the KVM console all the way out until it clicks into place;
- Rotate the LED module all the way back to expose the LED screen; the LED module can be rotated up to 108°.

### 2-2.2 open angle of the console

- The KVM makes two “beep” sounds after power on, an OSD window appears for you to input user name and password.  
8 Port /16 Port: The orange LED and LED tube are flashing before you enter your password.

24 Port /32 Port:  appears on LED tube without user name and password.

### 2-2.3 password window

- LED panel is powered on when the power LED is green.
- Power on the computer or server after power on the KVM.  
8 Port /16 Port: The LED of the connected port is green.  
24 Port /32 Port: There is no port LED.

The factory default pass word is blank; double click “Enter” to log in.

**\*NOTE: The username and password are no more than 16 characters, Press and hold the Shift key to type lowercase letters.**

**Please contact the manufacturer for support if the KVM is locked.**

Closing the console

- Close the LCD display panel and the power automatically shut down.
- Push the release catch in the direction of the arrow; pull the LED panel all the way in until it automatically locks up.

2-2.4 unlocking the console

LED OSD Configuration

The LED OSD allows you to set up and configure the LED display.

| Buttons     | Functions                                                                                                                                                   |
|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| MENU SELECT | Press this button invokes the menu function and brings up the main menu.                                                                                    |
| EXIT/AUTO   | Press this button exits the current menu and returns to the previous menu or presses this button exits the LED OSD. Press AUTO for automatic configuration. |
| SL-/SL+     | Press this button moves your menu to make corresponding adjustment.                                                                                         |
| LED state   | Green :running<br>Red: power off or access nonstandard VESA signal<br>Flash green: energy saving mode or no signal                                          |

Table 1 adjust the monitor

Press AUTO if the screen migrates after power on or under other circumstances, then the screen auto configure to its best display state.(It might can't be adjusted to its best state if part of the display mode is not standard VESA mode, if so return back to OSD menu to RESET, then it will back to normal.

We suggest our customers to set up the display mode at 1366×768, refresh rate at 60Hz.
